## TECHNICAL SKILLS

**Languages:** Python, SQL

**Libraries:** Pandas, NumPy

**NLP & Generative AI:** Tokenization, Embeddings, Semantic Search, RAG, Transformer Architecture, LLM

**AI Frameworks:** LangChain

**Databases:** SQL, ChromaDB (Vector Database)

**Tools:** Git, GitHub

## PROJECTS

### Hybrid Support Ticket Resolution Assistant | [GitHub](#)

Tech Stack: Python, Pandas, NumPy, SQL, ChromaDB, LangChain, NLP, LLM

- Built a **hybrid RAG pipeline** combining SQL metadata filtering and ChromaDB semantic retrieval to identify relevant historical support tickets and generate grounded LLM responses.
- Developed a **Pandas-based data pipeline** for cleaning, deduplication, missing-value handling, category/date normalization, and preparation of structured and unstructured ticket data.
- Implemented **Transformer-based embeddings, tokenization, text chunking, and LangChain orchestration**, with retrieval evaluation (chunking-strategy comparison and NumPy-based manual cosine similarity) and ticket-level source attribution to improve answer grounding.

### Feedback Insight Pipeline | [GitHub](#)

Tech Stack: Python, Pandas, NumPy, SQL, ChromaDB, NLP, LLM

- Built a **structured and unstructured analytics pipeline** combining SQL/Pandas rating trends with semantic analysis of customer feedback to identify recurring issues.
- Generated **Transformer-based embeddings** from tokenized free-text comments and applied semantic clustering to group related feedback, enabling analysis beyond keyword-based matching.
- Integrated an **LLM summarization layer** to combine quantitative trends with representative customer comments and evaluated cluster coherence and trend relationships.

## PROFESSIONAL EXPERIENCE

### Data Analyst Intern | Edulyt India

May – July 2025

Tech Stack: SQL, Python, Pandas, NumPy, Power BI, Excel

- Analyzed 50K+ customer transaction records using SQL, Pandas, and NumPy to compute spending statistics and identify customer behavior patterns, with findings visualized in Power BI.
- Cleaned and transformed raw datasets using Pandas — handling missing values, removing duplicates, and standardizing formats — to improve data quality and support reliable analysis.
- Built 3 interactive Power BI dashboards to communicate customer behavior trends to stakeholders.

## EDUCATION

Master of Computer Applications (MCA)

CGPA: 8.06/10

Bachelor of Computer Applications (BCA)

CGPA: 7.83/10

Amity University, Noida

Aug 2024– June 2026

Amity University, Noida

Sep 2021–June 2024

## CERTIFICATIONS

[Cisco Python Essentials 1](#)

## ACHIEVEMENTS

Ranked in the Top 10% in HackerRank Orchestrate, a 24-hour AI agent-building hackathon (Sept 2026).
